

Project Title: Ufundi College Website

1. Introduction

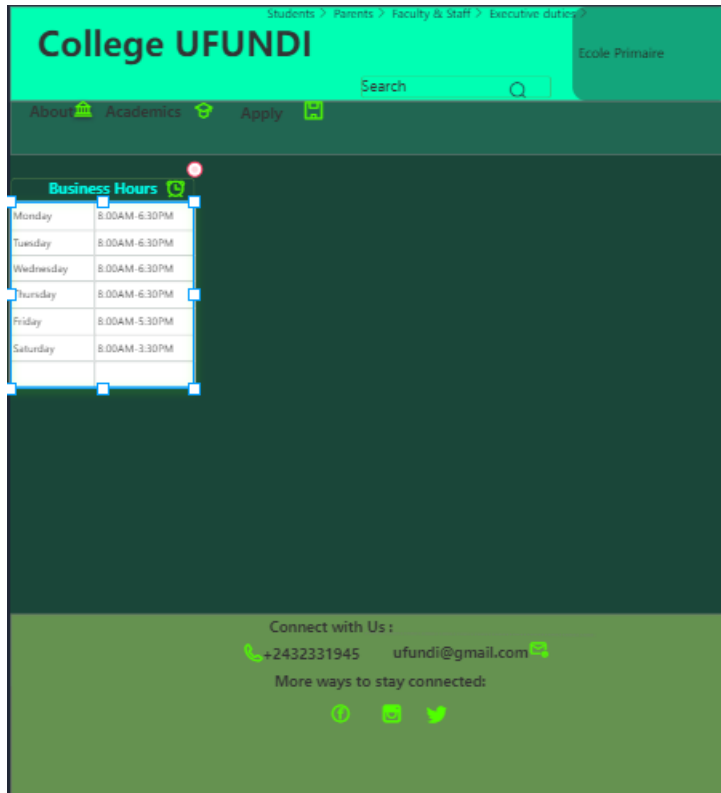

- With the challenges of COVID-19, many students have to stay home without being educating. However, in countries where technology is developed, they provide multiple platforms to learn, those countries are not facing any problem to continue educating their students.
- Starting with a website where students can get information such as when school will start, when the tuition is due and more.

2. User Interface Design and Prototype

- Give some sample user interface layouts for your application. You can use either Search option to find information easily
- Option to contact the school via email or phone number
- Location
- Social media integration
- Album photo with different events
- Some words animations

• 3. Navigation Structure

- The user will navigate on the website to view all the information places such academic calendar, business hours to contact the school and way to apply form for new students
